Executive Summary

OBJECTIVES

Our objective is to create a new Land O'Lakes website that will better enhance their online presence.

GOALS

Our goals are to update the areas where the current Land O'Lakes website is lacking and improve the current features used by the website.

SOLUTION

We hope to add a new student portal that will allow online student registration. We also hope to add both a teacher and volunteer portal so they can better manage courses and events. We hope to add a donation portal that will allow donors to create one time and recurring donations. Finally, we hope to add a data collection portal where administrators will be able to gather data collected by the website and organize it into grant reports.

LOUISVILLE BUSINESS ANALYSTS

System Requirements

The system Requirements provides a hierarchy of both functional and nonfunctional requirements that the system will need in order to perform its designed functions. The requirements are separated into categories based on the functions primary user. Requirements in category 1 correspond to the overall website functionality. Requirements in category 2 correspond to functions involved in the donation process. Requirements in category 3 correspond to functions involving students, including class registration, tuition payment, and class reviews. The requirements in category 4 correspond to functions involving staff and volunteers, including information about teacher class assignments and volunteer event assignments. The requirements in category 5 involve the need for a grant report system. These include data collection and an admin portal to view collected data.

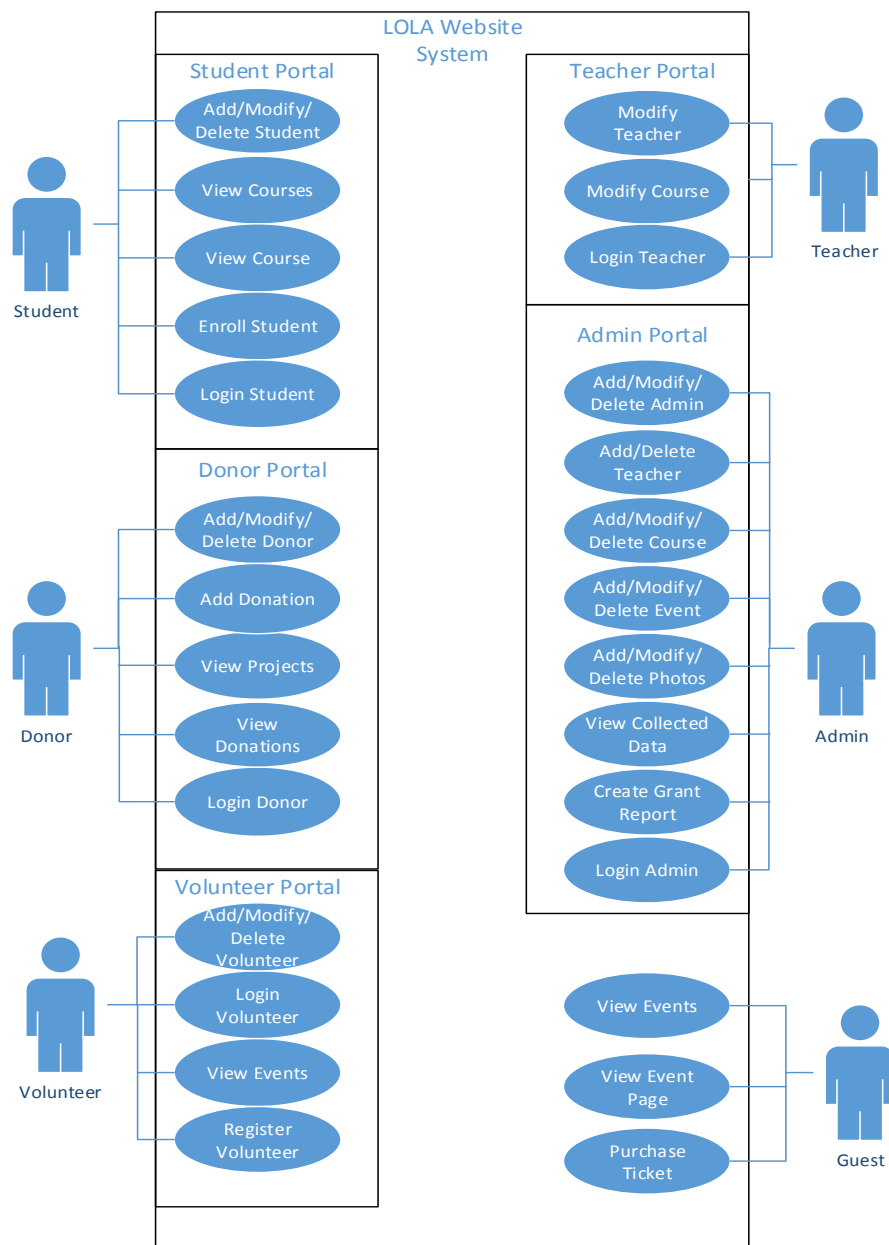

System Requirements	
1.0	The website shall be designed in WordPress to be able to easily add, modify, and delete pages as needed
2.0	The website shall have a donation portal
2.1	Donations shall be made using Stripe
2.2	Donors shall have the ability to make both recurring and one time donations
2.3	Donation data shall be gathered
2.4	Donors shall have the ability to donate towards a specific project
2.5	Donors shall have the ability to see where their donations are used
3.0	The website shall have a student portal
3.1	Students shall have the ability to register for classes online
3.2	Students shall have the ability to pay for classes online
3.3	Students shall have the ability to post class reviews
3.4	Students shall have the ability to search for currently offered classes
4.0	The website shall have an staff portal
4.1	Staff shall have the ability to submit request to teach a class
4.2	Volunteers shall have the ability to sign up for specific events
4.3	Instructors shall be able to view class information about their classes
5.0	The website shall have the ability to produce grant reports
5.1	Staff shall be able to view grant reports
5.2	The website shall have the ability to collect and store data about business activities

LOUISVILLE BUSINESS ANALYSTS

Use Case Diagram

HOW TO READ THE USE CASE DIAGRAM

The use case diagram displays how different types of users interact with the system.

Use Cases: Add Student

ADD STUDENT

This use case describes how a student would create an account

USE CASE: ADD STUDENT

ID: 1A

Risk Level: Low

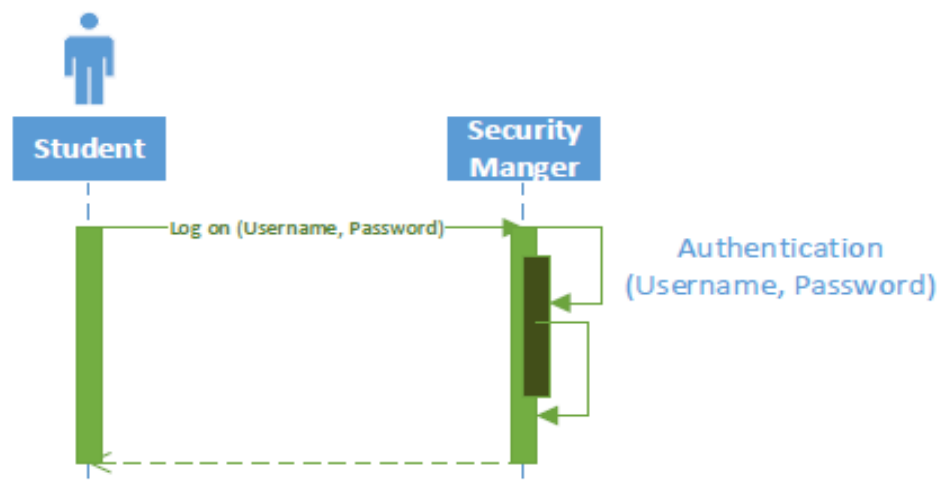

Primary Actor: Student

Preconditions: Student account does not exist

Postconditions: Student account is created

Main Flow:

1. Visitor goes to www.lolaartswi.com
2. Visitor clicks on "Become a Student" button on the homepage.
3. Visitor is directed to Student account creation page.
4. Visitor enters first name in first name text box.
5. Visitor enters last name in last name text box.
6. Visitor enters email in email textbox.
7. Visitor enters password in password textbox.
8. Visitor enters password in re-enter password textbox.
9. Visitor enters address in address textbox.
10. Visitor enters city in city textbox.
11. Visitor selects state from combo box.
12. Visitor enters zip code in zip code textbox.
13. Visitor clicks "Become a Student" button at bottom of page.
14. Visitor is directed to Student account page.
15. Visitor is added to student table in database.
16. Visitor receives confirmation email.
17. Use case ends.

Use Cases: Modify Student

MODIFY STUDENT

This use case describes how a student would modify his or her account

USE CASE: MODIFY STUDENT

ID: 1B

Risk Level: Low

Primary Actor: Student

Preconditions: None

Postconditions: Student account is modified

Main Flow:

- 1.User goes to www.lolaartwsi.com
- 2.User Enter username in the textbox
- 3.User Enters password in the textbox
- 4.User Clicks Log on
- 5.User Clicks on Students
- 6.User Selects a student to modify
- 7.User then clicks modify Student
- 8.User modify student
- 9.User clicks save
- 10.A pop up display asking if you are sure you want to save changes
- 11.User Clicks" yes"
- 12.User then directed to new screen which says "Changes Saved"
- 13.Student is modified
- 14.Use Case Ends

Use Cases: Delete Student

DELETE STUDENT

This use case describes how a student would delete his or her account

USE CASE: DELETE STUDENT

ID: 1C

Risk Level: Low

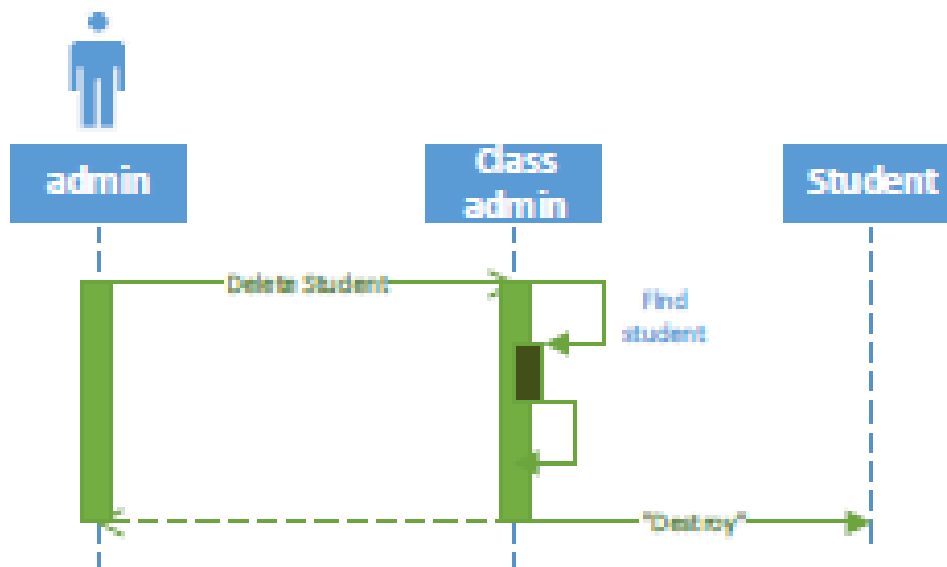

Primary Actor: Student

Preconditions: None

Postconditions: Account is deleted

Main Flow:

1. User goes to www.lolaartwsi.com
2. User Enter username in the textbox
3. User Enters password in the textbox
4. User Clicks Log on
5. Admin directed to admin page
6. User Clicks on Students
7. User Selects a student to delete
8. User then clicks Delete Student
9. A pop up display asking if you are sure you want to delete student
10. User Clicks "yes"
11. User then directed to new showing "Student Deleted successful"
12. Student is deleted
13. Use Case Ends

Use Cases: View Courses

VIEW COURSES

This use case describes how a student would view all available classes

USE CASE: VIEW CLASSES

ID: 1D

Risk Level: Low

Primary Actor: Student

Preconditions: None

Postconditions: Student is directed to classes page

Main Flow:

- 1.User goes to www.lolaartwsi.com
- 2.User Enter username in the textbox
- 3.User Enters password in the textbox
- 4.User Clicks "Log on"
- 5.Student Directed to student Page
- 6.Student clicks "Classes"
- 7.Student Views Classes that are offered
- 8.Use case ends

Use Cases: View Course

VIEW COURSE

This use case describes how a student would view class information

USE CASE: VIEW COURSE

ID: 1E

Risk Level: Low

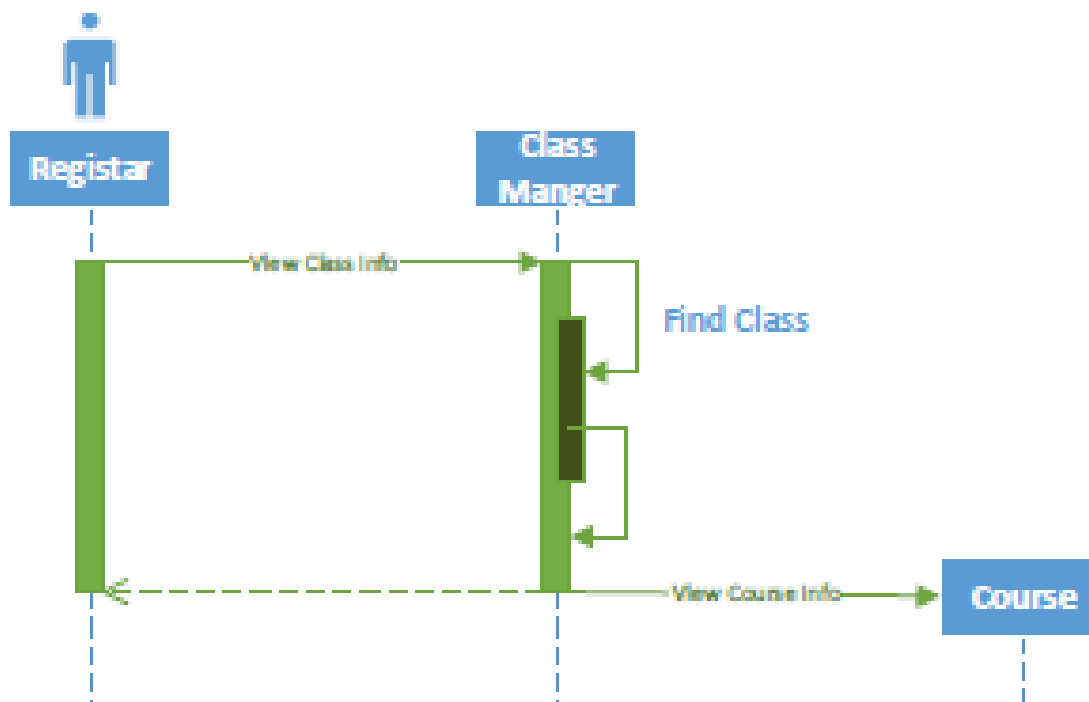

Primary Actor: Student

Preconditions: None

Postconditions: Student is directed to class page

Main Flow:

- 1.User goes to www.lolaartwsi.com
- 2.User Enter username in the textbox
- 3.User Enters password in the textbox
- 4.User Clicks "Log on"
- 5.Student Directed to student Page
- 6.Student clicks "Classes"
- 7.Student clicks on Class
- 8.Student Views Class info of selected class
- 9.Use case ends

Use Cases: Enroll Student

ENROLL STUDENT

This use case describes how a student would enroll in a class

USE CASE: ENROLL STUDENT

ID: 1F

Risk Level: High

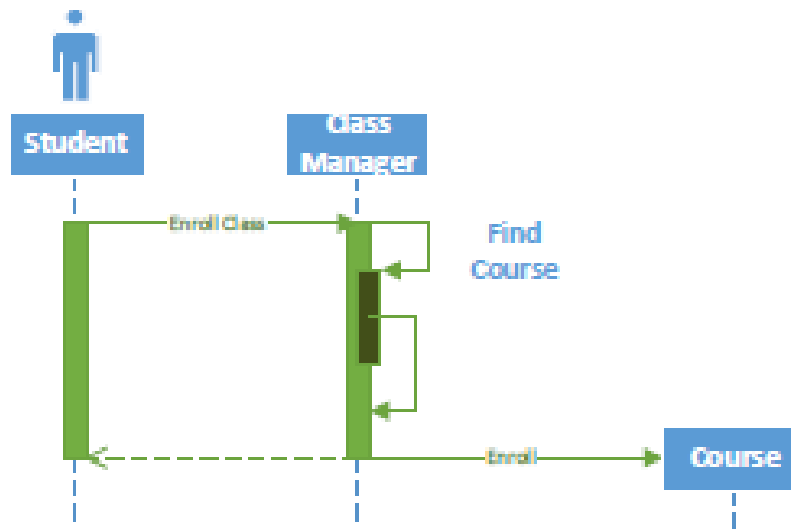

Primary Actor: Student

Preconditions: None

Postconditions: Student is enrolled

Main Flow:

1. User goes to www.lolaartwsi.com
2. User Enter username in the textbox
3. User Enters password in the textbox
4. User Clicks "Log on"
5. Student Directed to student Page
6. Student clicks "Classes"
7. Student Views Classes that are offered
8. Student clicks on Class
9. Student views information about selected class
10. Student clicks "Enroll Class"
11. Student directed to payment page
12. Student selects method of payment
13. Student Enters Credentials
14. Student hits "Pay For Class"
15. Student directed to page saying "Successfully Enrolled "
16. Use case ends

LOUISVILLE BUSINESS ANALYSTS

Use Cases: Review Course

REVIEW CLASS

This use case describes how a student would post a class review

USE CASE: REVIEW CLASS

ID: 1G

Risk Level: Low

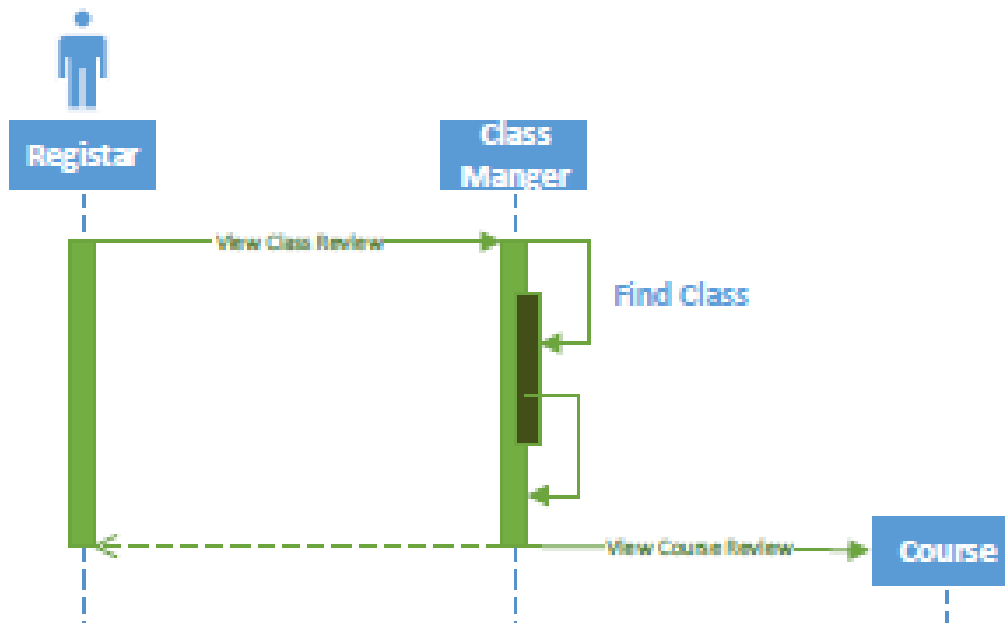

Primary Actor: Student

Preconditions: Student has taken class

Postconditions: Student posts review

Main Flow:

- 1.User goes to www.lolaartwsi.com
- 2.User Enter username in the textbox
- 3.User Enters password in the textbox
- 4.User Clicks "Log on"
- 5.Student Directed to student Page
- 6.Student clicks "class reviews"
- 7.Student clicks on class
- 8.Student types review for selected class
- 9.Student then clicks "Submit Review"
- 10.Student then is directed to page which says "Review Successfully Submitted"
- 11.Use case ends

Use Cases: Log In Student

LOG IN

This use case describes how a student would log into his or her account

USE CASE: LOG IN

ID: 1H

Risk Level: Low

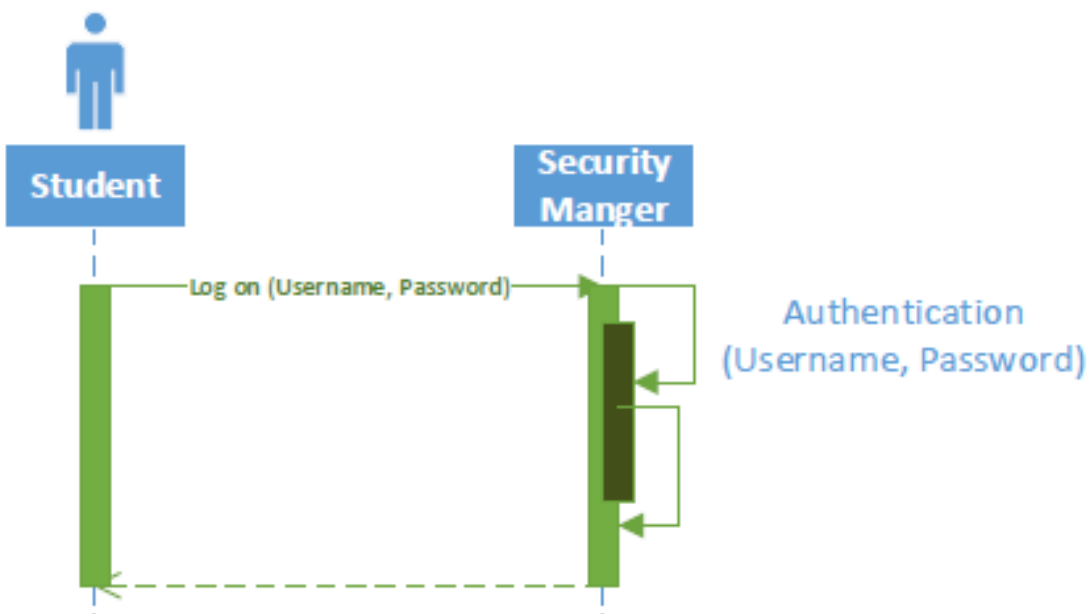

Primary Actor: Student

Preconditions: Student is not logged in

Postconditions: Student is logged in

Main Flow:

1. User goes to www.lolaartwsi.com
2. User Enter username in the textbox
3. User Enters password in the textbox
4. User Clicks "Log on"
5. Student Directed to student Page
6. Use case ends

Use Cases: Add Donation

ADD DONATION

This use case describes how a user would make a one time donation

USE CASE: ADD DONATION

ID: 2A

Risk Level: High

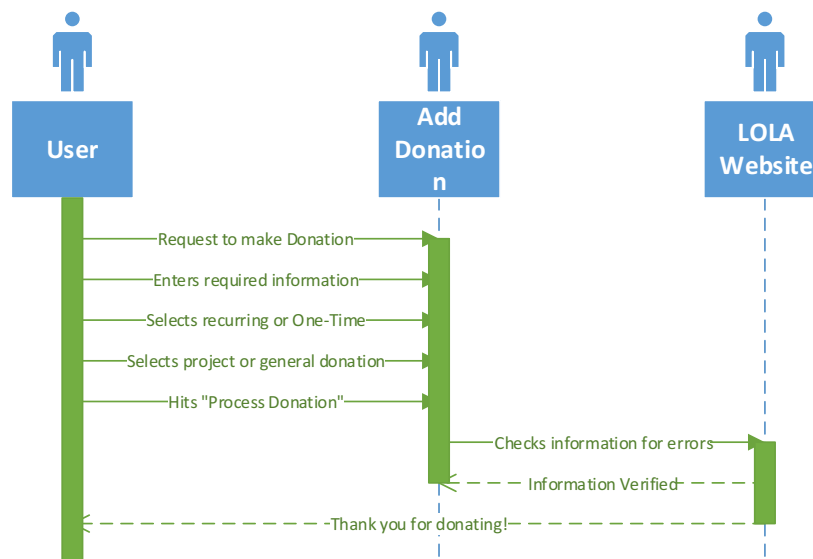

Primary Actor: Donor

Preconditions: None

Postconditions: Donation is made

Main Flow:

1. User goes to www.lolaartwsi.com
2. User enters username in user name textbox
3. User enters password in password textbox
4. User clicks log in button
5. User clicks on the donation tab from the home page
6. User is directed to the donation page
7. User enters needed information into given textboxes
8. User then selects if he/she wants a recurring donation or a one time-donation
9. User then has option to select a given project or a general donation
10. User enters amount he/she wants to donate
11. User selects payment method (Credit card or pay-pal)
12. User enters credit card information if credit card is selected
13. User hits submit
14. New page pops up confirming donation
15. Use Case ends

Use Cases: Add Donor

ADD DONOR

This use case describes how a donor would make an account

USE CASE: ADD DONOR

ID: 2B

Risk Level: Low

Primary Actor: Donor

Preconditions: None

Postconditions: Donor account is created

Main Flow:

1. Visitor goes to www.lolaartswi.com
2. Visitor clicks on "Become a Donor" button on the homepage.
3. Visitor is directed to Donor account creation page.
4. Visitor enters first name in first name text box.
5. Visitor enters last name in last name text box.
6. Visitor enters email in email textbox.
7. Visitor enters password in password textbox.
8. Visitor enters password in re-enter password textbox.
9. Visitor enters address in address textbox.
10. Visitor enters city in city textbox.
11. Visitor selects state from combo box.
12. Visitor enters zip code in zip code textbox.
13. Visitor clicks "Become a Donor" button at bottom of page.
14. Visitor is directed to Donor account page.
15. Visitor is added to donor table in database.
16. Visitor receives confirmation email.
17. Use case ends.

Use Cases: Add Recurring Donation

ADD RECURRING DONATION

This use case describes how a donor would create a recurring donation

USE CASE: ADD RECURRING DONATION

ID: 2C

Risk Level: High

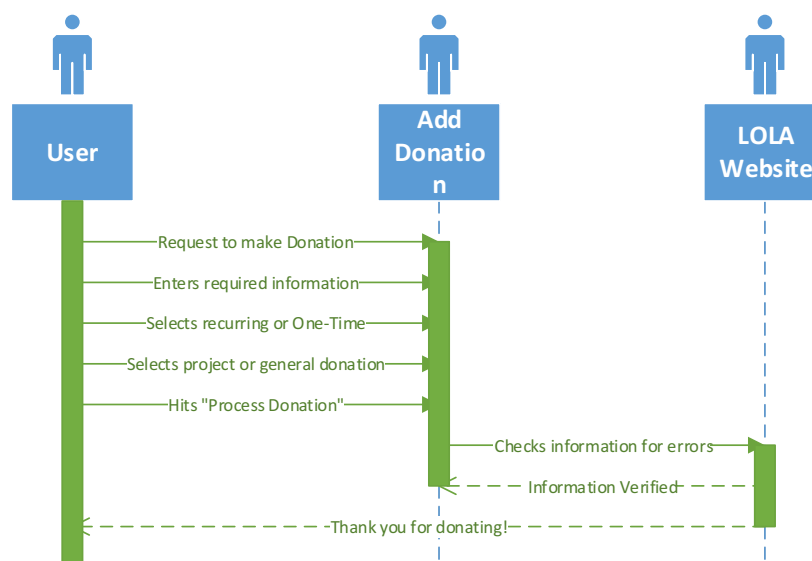

Primary Actor: Donor

Preconditions: None

Postconditions: Recurring donation is made

Main Flow:

1. User goes to www.lolaartwsi.com
2. User enters username in user name textbox
3. User enters password in password textbox
4. User clicks log in button
5. User clicks on the donation tab from the home page
6. User is directed to the donation page
7. User enters needed information into given textboxes
8. User then selects if he/she wants a recurring donation or a one time-donation
9. User then has option to select a given project or a general donation
10. User enters amount he/she wants to donate
11. User selects recurring donation
12. User enters recursion period
13. User selects payment method (Credit card or pay-pal)
14. User enters credit card information if credit card is selected
15. User hits submit
16. New page pops up confirming donation
17. Use Case ends

Use Cases: Modify Donor

MODIFY DONOR

This use case describes how a donor would modify his or her account

USE CASE: MODIFY DONOR

ID: 2D

Risk Level: Low

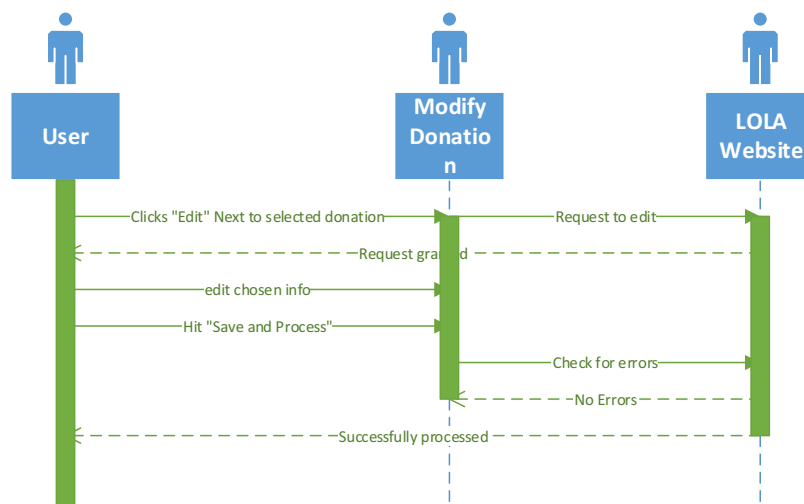

Primary Actor: Donor

Preconditions: None

Postconditions: Donor account is modified

Main Flow:

1. User goes to www.lolaartswi.com
2. User then enters username into username textbox
3. User enters password into password textbox
4. User clicks log in
5. User is logged in
6. User clicks donation tab
7. User is directed to donation page
8. User clicks My account
9. User is directed to donation history page
10. User chooses which donation to edit
11. User clicks "Edit" next to selected donation
12. User edits donation by changing amount or changing recurring to one-time
13. User clicks "Save Changes"
14. User is redirected to confirmation page
15. Use Case Ends

Use Cases: Delete Donor

DELETE DONOR

This use case describes how a donor would delete his or her account

USE CASE: DELETE DONOR

ID: 2E

Risk Level: Low

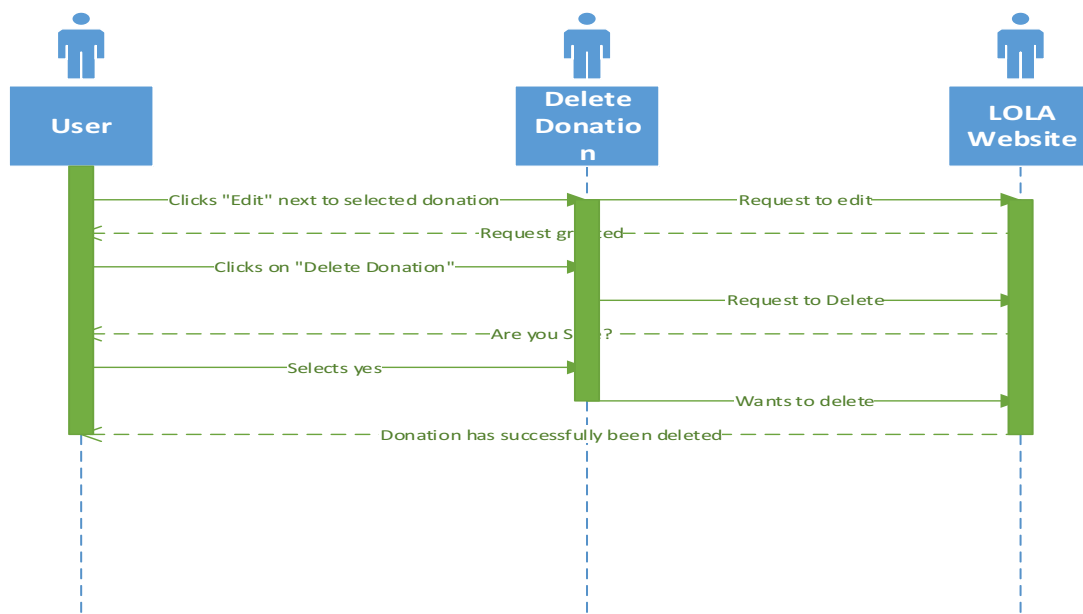

Primary Actor: Donor

Preconditions: None

Postconditions: Donor account is deleted

Main Flow:

1. User goes to www.lolaartswi.com
2. User Enters Username in Username textbox
3. User enters password into password textbox
4. User clicks "Log In"
5. User is logged in
6. User clicks on the donation tab
7. User is directed to the donation page
8. User clicks view donations
9. User is directed to current/past donations page
10. User clicks "Edit" next to donation wanted to be deleted
11. User is directed to edit donations page
12. User clicks "Delete Donation"
13. Message appears asking if user is sure he/she wants to delete donation
14. User clicks yes
15. User is directed to confirmation page
16. Use case ends

Use Cases: View Projects

VIEW PROJECTS

This use case describes how a donor would view projects accepting donations

USE CASE: VIEW PROJECTS

ID: 2F

Risk Level: Low

Primary Actor: Donor

Preconditions: None

Postconditions: Donor is directed to projects page

Main Flow:

1. User goes to www.lolaartswi.com
2. User clicks on donations tab
3. User is directed to donations page
4. Use case ends

Use Cases: View Donations

VIEW DONATIONS

This use case describes how a donor would view where his or her donations have been used

USE CASE: VIEW DONATIONS

ID: 2F

Risk Level: Low

Primary Actor: Donor

Preconditions: None

Postconditions: Donor is directed to donations page

Main Flow:

1. User goes to www.lolaartswi.com
2. User then enters username into username textbox
3. User enters password into password textbox
4. User clicks log in
5. User is logged in
6. User clicks donation tab
7. User is directed to donation page
8. User clicks My account
9. User is directed to donation history page
10. Use case ends

Use Cases: Log In Donor

LOG IN

This use case describes how a donor would log into his or her account

USE CASE: LOG IN

ID: 2G

Risk Level: Low

Primary Actor: Donor

Preconditions: Donor is not logged in

Postconditions: Donor is logged in

Main Flow:

1. User goes to www.lolaartswi.com
2. User then enters username into username textbox
3. User enters password into password textbox
4. User clicks log in
5. User is logged in

Use Cases: Add Volunteer

ADD VOLUNTEER

This use case describes how a user would create a volunteer account

USE CASE: ADD VOLUNTEER

ID: 3A

Risk Level: Low

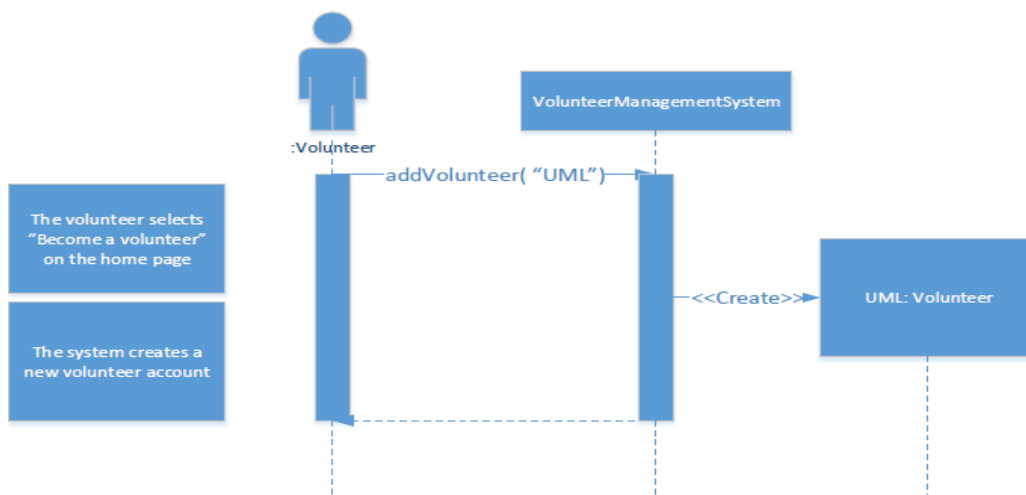

Primary Actor: User

Preconditions: None

Postconditions: Volunteer account is created

Main Flow:

1. Visitor goes to www.lolaartswi.com
2. Visitor clicks on "Become a volunteer" button on the homepage.
3. Visitor is directed to volunteer account creation page.
4. Visitor enters first name in first name text box.
5. Visitor enters last name in last name text box.
6. Visitor enters email in email textbox.
7. Visitor enters password in password textbox.
8. Visitor enters password in re-enter password textbox.
9. Visitor enters address in address textbox.
10. Visitor enters city in city textbox.
11. Visitor selects state from combo box.
12. Visitor enters zip code in zip code textbox.
13. Visitor clicks "Become a volunteer" button at bottom of page.
14. Visitor is directed to volunteer account page.
15. Visitor is added to volunteer table in database.
16. Visitor receives confirmation email.
17. Use case ends.

Use Cases: Modify Volunteer

MODIFY VOLUNTEER

This use case describes how a volunteer would modify his or her account

USE CASE: MODIFY VOLUNTEER

ID: 3B

Risk Level: Low

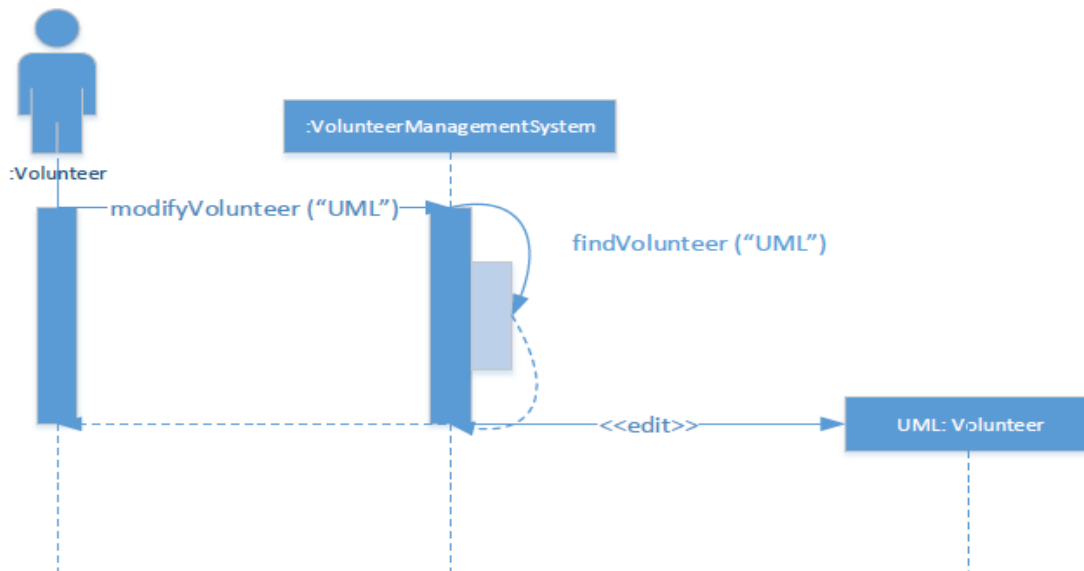

Primary Actor: Volunteer

Preconditions: None

Postconditions: Volunteer account is modified

Main Flow:

- 1.Volunteer goes to www.lolaartswi.com
- 2.Volunteer clicks on volunteer tab on home page.
- 3.Volunteer enters username in username textbox.
- 4.Volunteer enters password in password textbox.
- 5.Volunteer clicks "log in" button
- 6.Volunteer is directed to account page.
- 7.Volunteer clicks "edit account" link.
- 8.Volunteer is directed to edit account page.
- 9.Volunteer changes account info
- 10.Volunteer clicks "save changes"
- 11.Volunteer is directed back to account page
- 12.New volunteer data is updated in database
- 13.Use case ends.

Use Cases: Delete Volunteer

DELETE VOLUNTEER

This use case describes how a volunteer would delete his or her account

USE CASE:DELETE VOLUNTEER

ID: 3C

Risk Level: Low

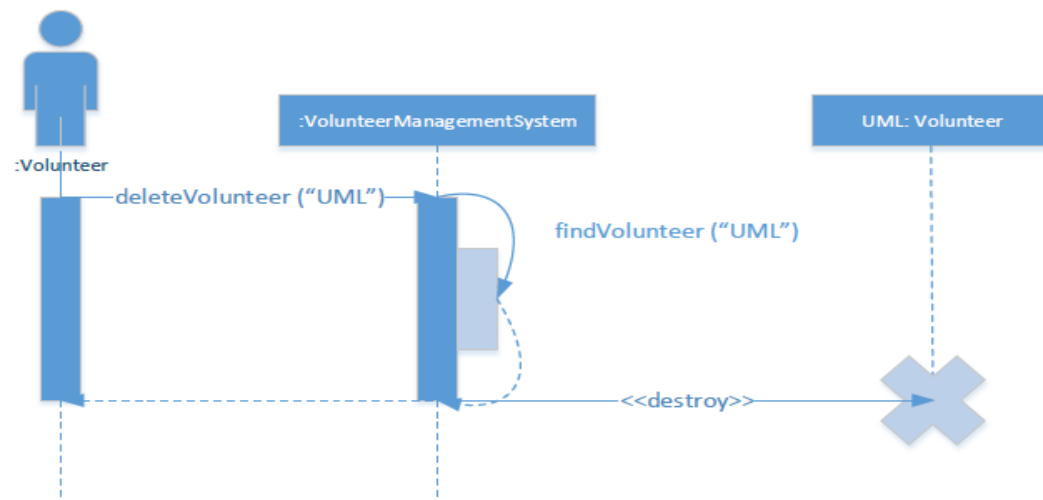

Primary Actor: Volunteer

Preconditions: None

Postconditions: Volunteer account is deleted

Main Flow:

- 1.Volunteer goes to www.lolaartswi.com
- 2.Volunteer clicks on volunteer tab on home page.
- 3.Volunteer enters username in username textbox.
- 4.Volunteer enters password in password textbox.
- 5.Volunteer clicks "log in" button
- 6.Volunteer is directed to account page.
- 7.Volunteer clicks on delete account link
- 8.Volunteer is directed to account deletion page
- 9.Volunteer clicks delete account.
- 10.Message box asking "are you sure you want to delete your account?"
- 11.User clicks "yes button"
- 12.Visitor is directed to successful account delete page.
- 13.Visitor receives confirmation email
- 14.Visitor account is removed from database.
- 15.Use case ends.

Use Cases: View Events

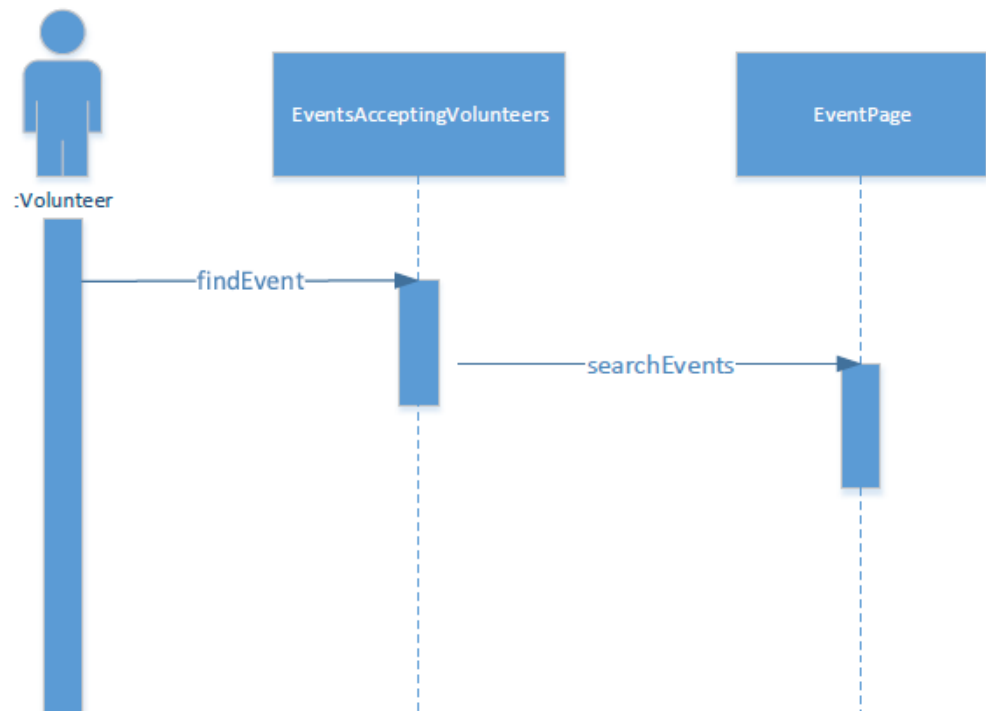

VIEW EVENTS

This use case describes how a user would view events accepting volunteers

USE CASE: VIEW EVENTS	ID: 3D
Risk Level: Low	Primary Actor: Volunteer
Preconditions: None	Postconditions: Volunteer is directed to events page

Main Flow:

- 1.Volunteer goes to www.lolaartswi.com
- 2.Volunteer clicks on volunteer tab on home page.
- 3.Volunteer enters username in username textbox.
- 4.Volunteer enters password in password textbox.
- 5.Volunteer clicks "log in" button
- 6.Volunteer is directed to volunteer account page
- 7.Volunteer clicks "view events" button
- 8.Volunteer is directed to volunteerable events page.
- 9.Use case ends

Use Cases: Register Volunteer

REGISTER VOLUNTEER

This use case describes how a volunteer would register for an event

USE CASE: REGISTER VOLUNTEER

ID: 3E

Risk Level: Low

Primary Actor: Volunteer

Preconditions: None

Postconditions: Volunteer is registered for event

Main Flow:

- 1.Volunteer goes to www.lolaartswi.com
2. Volunteer clicks on volunteer tab on home page.
- 3.Volunteer enters username in username textbox.
- 4.Volunteer enters password in password textbox.
- 5.Volunteer clicks "log in" button
- 6.Volunteer is directed to volunteer account page
- 7.Volunteer clicks "view events" button
- 8.Volunteer is directed to volunteerable events page.
- 9.Volunteer clicks desired event link
- 10.Volunteer is directed to event page
- 11.Volunteer clicks "volunteer for this event" button.
- 12.Message box "Are you sure you want to volunteer?"
- 13.Volunteer clicks "Yes" button
- 14.Volunteer is directed to event page.
- 15.Volunteer receives confirmation email
- 16.Event data in database is updated (volunteers needed is reduced by 1)
- 17.Use case ends

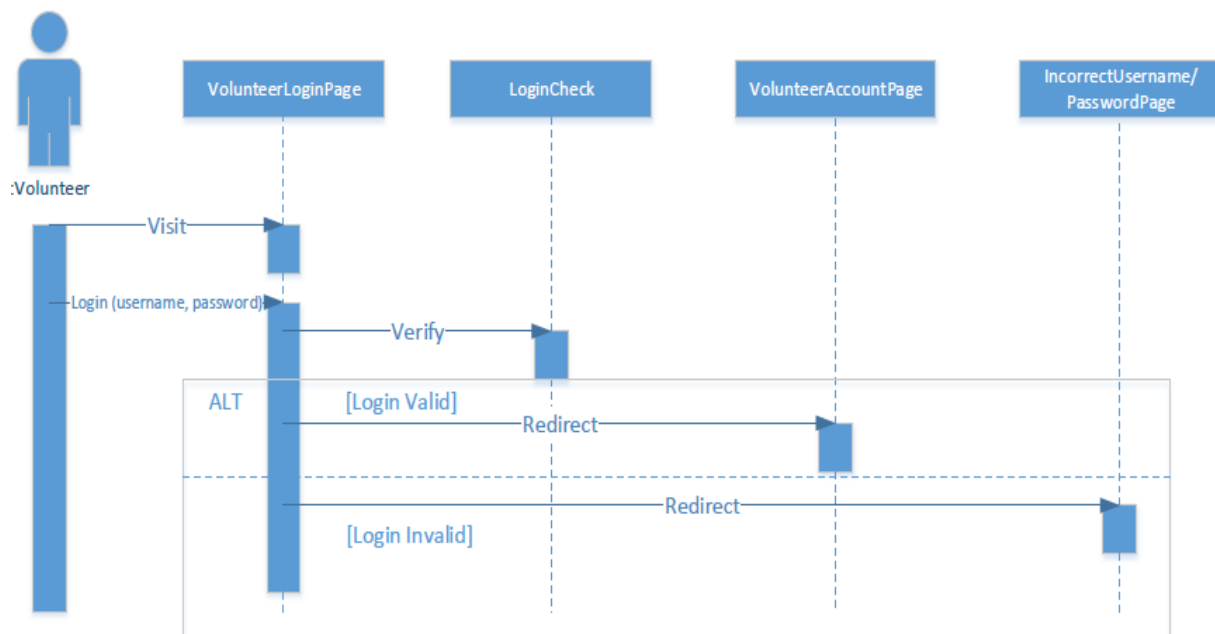

Use Cases: Log In Volunteer

LOG IN

This use case describes how a volunteer would log into his or her account

USE CASE: LOG IN		ID: 3F
Risk Level: Low	Primary Actor: Volunteer	
Preconditions: Volunteer is not logged into account	Postconditions: Volunteer is logged into account	
Main Flow:		
1.Volunteer goes to www.lolaartswi.com		
2.Volunteer clicks on volunteer tab on home page.		
3.Volunteer enters username in username textbox.		
4.Volunteer enters password in password textbox.		
5.Volunteer clicks "log in" button		
6.Volunteer is directed to volunteer account page		
7.Use case ends		

Use Cases: Add Teacher

ADD TEACHER

This use case describes how an administrator would create a teacher account

USE CASE:ADD TEACHER

ID: 4A

Risk Level: Low

Primary Actor: Admin

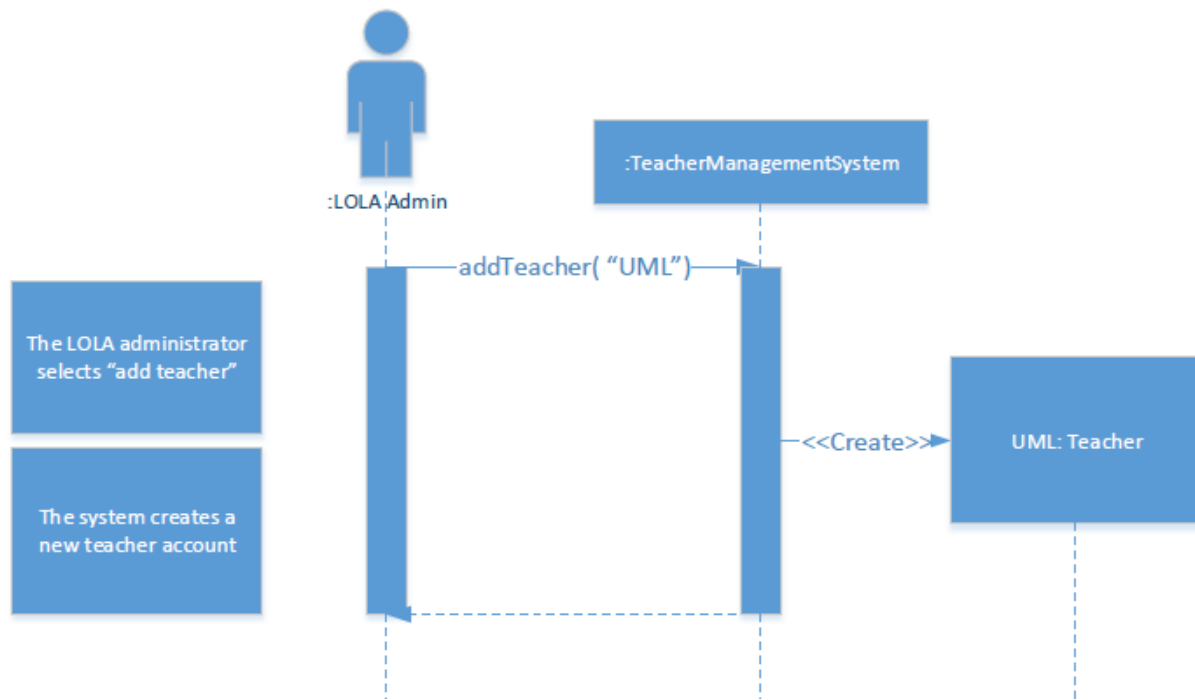

Preconditions: Teacher does not have account

Postconditions: Teacher account is created

Main Flow:

- 1.Administrator goes to www.lolaartswi.com
- 2.Admin clicks "Administration" link at bottom of home page
- 3.Admin is directed to admin log in page
- 4.Admin enters username in username textbox
- 5.Admin enters password in password textbox
- 6.Admin clicks "log in" link
- 7.Admin is directed to Administration page
- 8.Admin clicks "Add instructor account" link
- 9.Admin is directed to instructor account creation page
- 10.Admin enters new instructor first name in first name textbox
- 11.Admin enters new instructor last name in last name textbox.
- 12.Admin enters new instructor address in address textbox.
- 13.Admin enters new instructor city in city textbox
- 14.Admin selects new instructor state from state combo box
- 15.Admin enters new instructor zip code in zip code textbox
- 16.Admin enters new instructor email in email textbox
- 17.Admin enters new instructor password in password textbox
- 18.Admin reenters new instructor password in password textbox
- 19.Admin enters new instructor phone number in phone number textbox
- 20.Admin enters new instructor class in class textbox.
- 21.Admin clicks "create instructor account" link
- 22.Admin is directed to successful account creation page "Creation successful"
- 23.New instructor data is added to database.
- 24.Instructor receives new account email confirmation
- 25.Use case ends

LOUISVILLE BUSINESS ANALYSTS

Use Cases: Modify Teacher

MODIFY TEACHER

This use case describes how a teacher would modify his or her account

USE CASE: MODIFY TEACHER

ID: 4B

Risk Level: Low

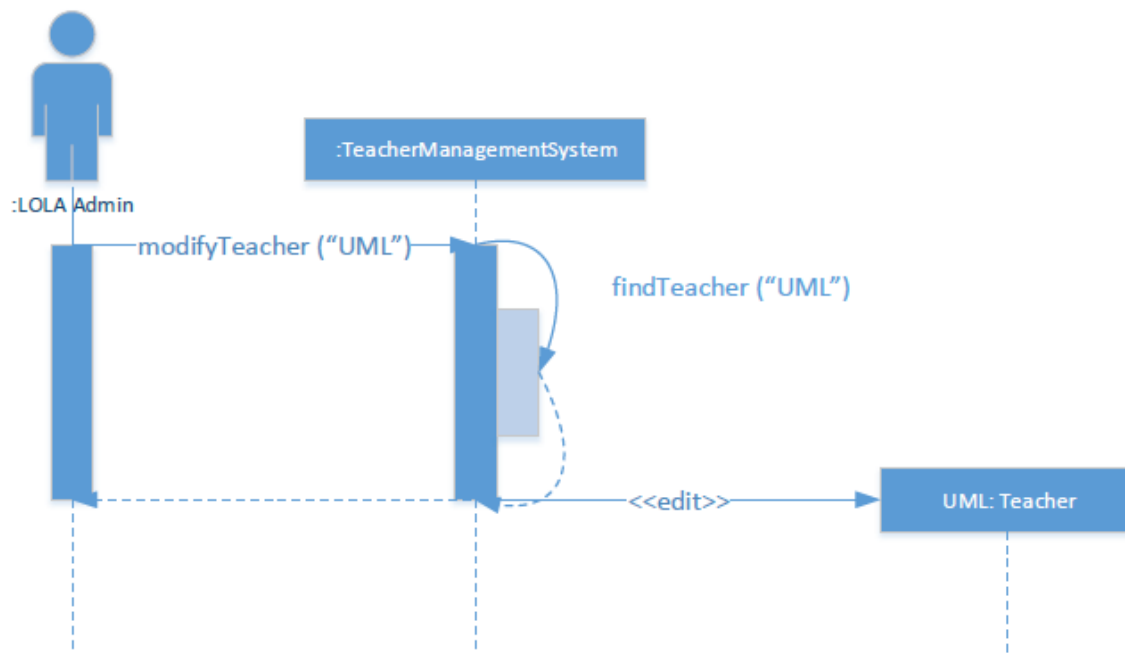

Primary Actor: Teacher

Preconditions: None

Postconditions: Teacher account is modified

Main Flow:

- 1.Instructor goes to www.lolaartswi.com
- 2.Instructor clicks "instructors" link at bottom of home page
- 3.Instructor is directed to instructor log in page
- 4.Instructor enters username in username text box
- 5.Instructor enters password in password textbox
- 6.Instructor clicks "log in"
- 7.Instructor is directed to account page
- 8.Instructor clicks "edit account" link
- 9.Instructor is directed to account editing page
- 10.Instructor edits account
- 11.Instructor clicks "save changes"
- 12.Instructor is directed to account page
- 13.Instructor data is updated in data base
- 14.Use case ends

Use Cases: Delete Teacher

DELETE TEACHER

This use case describes how an admin would delete a teacher account

USE CASE: DELETE TEACHER

ID: 4C

Risk Level: Low

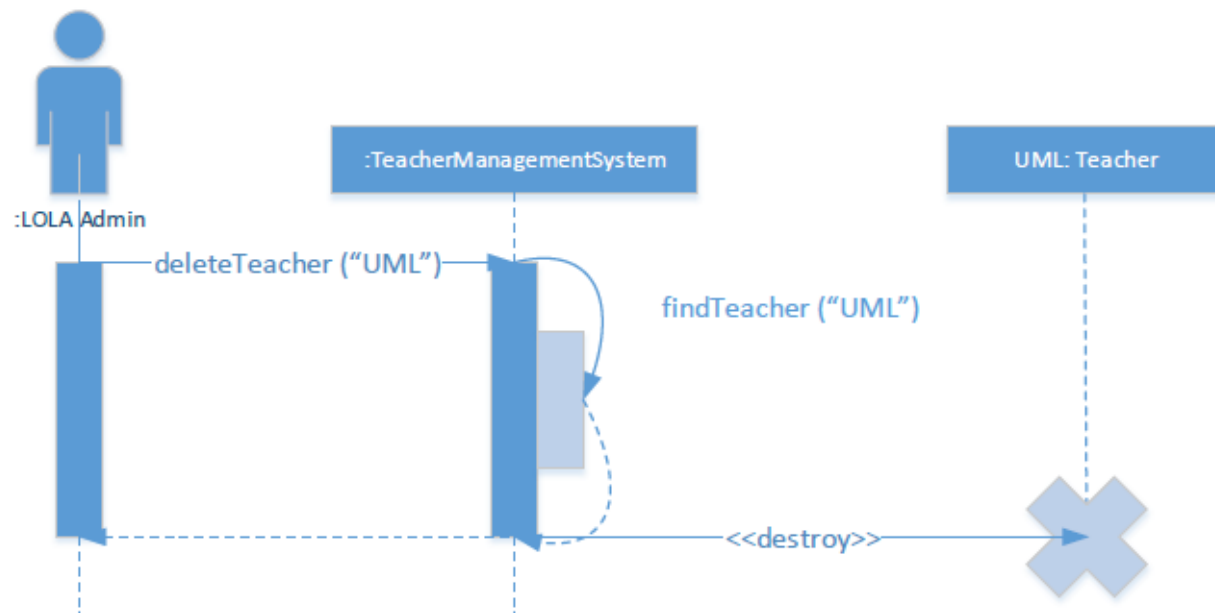

Primary Actor: Admin

Preconditions: None

Postconditions: Teacher account is deleted

Main Flow:

- 1.Admin goes to www.lolaartswi.com
- 2.Admin clicks "Administration" link at bottom of home page
- 3.Admin is directed to admin log in page
- 4.Admin enters username in username textbox
- 5.Admin enters password in password textbox
- 6.Admin clicks "log in" link
- 7.Admin is directed to Administration page
- 8.Admin clicks "delete instructor account"
- 9.Admin is directed to account deletion page
- 10.Admin selects instructor account to delete
- 11.Message box "Are you sure you want to delete this account?"
- 12.Admin clicks "yes"
- 13.Admin is directed to successful account deletion page "The account has been successfully deleted"
- 14.Admin account in removed from database
- 15.Use case ends

Use Cases: Add Course

ADD COURSE

This use case describes how an admin would create a course

USE CASE:ADD COURSE

ID: 4D

Risk Level: Low

Primary Actor: Admin

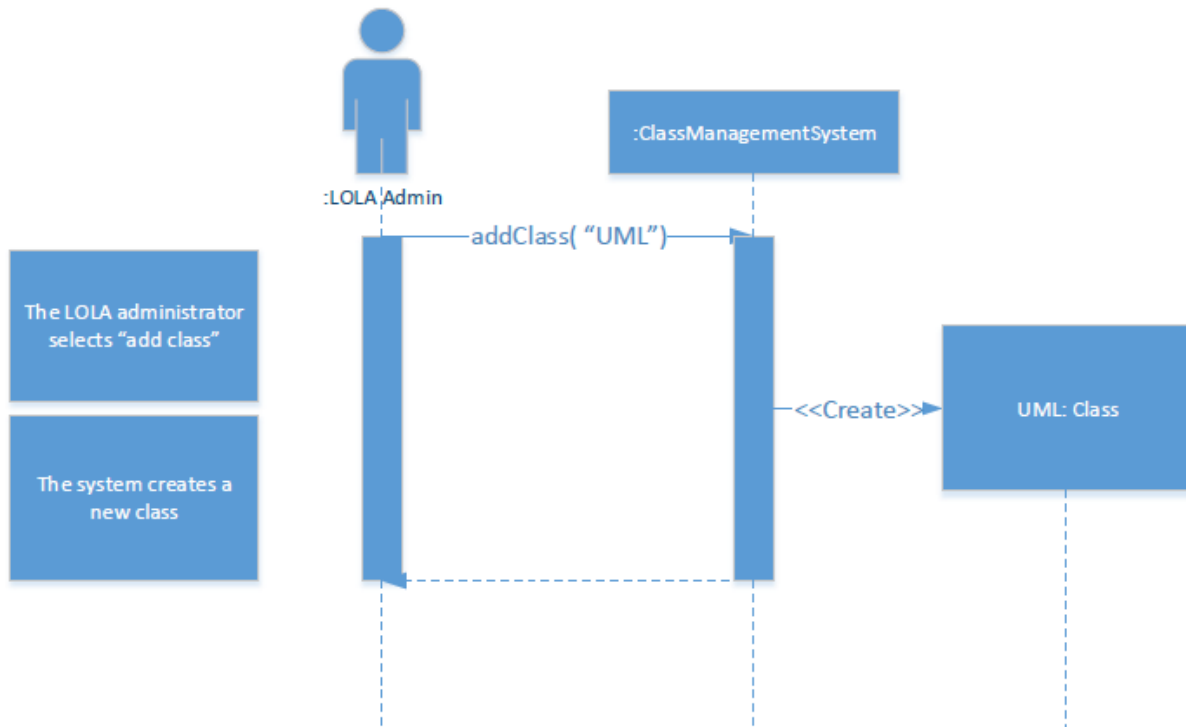

Preconditions: None

Postconditions: Course is created

Main Flow:

- 1.Admin goes to www.lolaartswi.com
- 2.Admin clicks on "administration" link at bottom of home page
- 3.Admin is directed to admin log in page
- 4.Admin enters username in username text box
- 5.Admin enters password in password text box
- 6.Admin clicks "log in" link
- 7.Admin is directed to admin account page
- 8.Admin clicks "add class" link
- 9.Admin is directed to class creation page
- 10.Admin enters class title in title textbox
- 11.Admin enters class instructor in instructor textbox
- 12.Admin enters class description in description textbox
- 13.Admin selects days class meets from days options
- 14.Admin selects time class meets form time options
- 15.Admin selects start date from calendar widget
- 16.Admin selects end date from calendar widget
- 17.Admin uploads photos into optional photos
- 18.Admin enters class cost in cost textbox
- 19.Admin enters max enrolment in max enrolment textbox

LOUISVILLE BUSINESS ANALYSTS

Use Cases: Modify Course

MODIFY COURSE

This use case describes how an instructor would modify a course

USE CASE:MODIFY COURSE

ID: 4D

Risk Level: Low

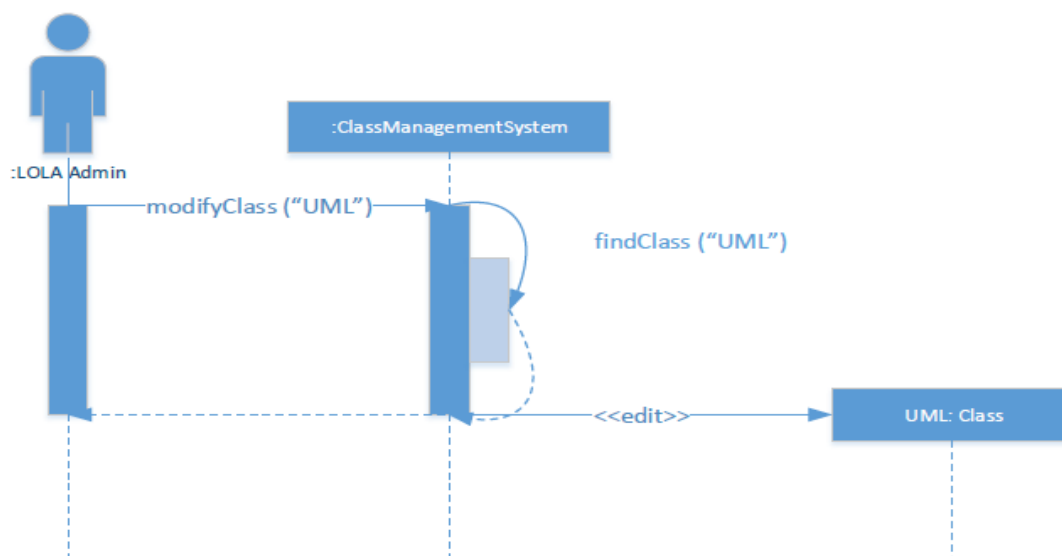

Primary Actor: Teacher

Preconditions: None

Postconditions: Course is modified

Main Flow:

- 1.Instructor goes to www.lolaartswi.com
- 2.Instructor clicks "instructors" link at bottom of home page
- 3.Instructor is directed to instructor log in page
- 4.Instructor enters username in username text box
- 5.Instructor enters password in password textbox
- 6.Instructor clicks "log in"
- 7.Instructor is directed to account page
- 8.Instructor clicks desired class from "My classes" box
- 9.Instructor is directed to class page
- 10.Instructor clicks "edit class" link
- 11.Instructor is directed to edit class info page
- 12.Instructor edits class info
- 13.Instructor clicks "save changes" at bottom of page
- 14.Changes are made in database to class
- 15.Instructor is directed to class info page
- 16.Use case ends

Use Cases: Delete Course

DELETE COURSE

This use case describes how an admin would delete a course

USE CASE: DELETE COURSE

ID: 4D

Risk Level: Low

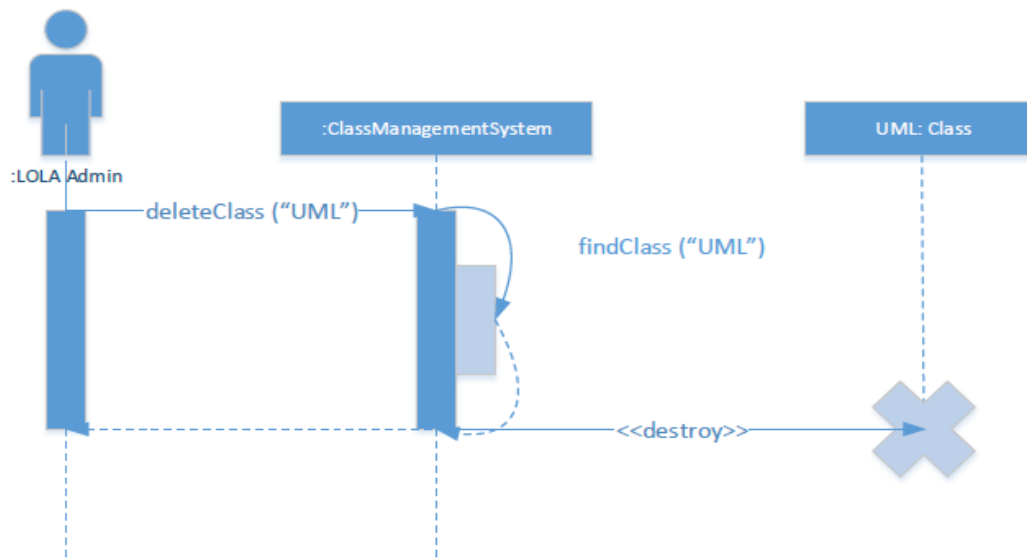

Primary Actor: Admin

Preconditions: None

Postconditions: Course is deleted

Main Flow:

- 1.Admin goes to www.lolaartswi.com
- 2.Admin clicks on "administration" link at bottom of home page
- 3.Admin is directed to admin log in page
- 4.Admin enters username in username text box
- 5.Admin enters password in password text box
- 6.Admin clicks "log in" link
- 7.Admin is directed to admin account page
- 8.Admin clicks "delete class" link
- 9.Admin is directed to class deletion page
- 10.Admin clicks desired class
- 11.Message box "Are you sure you want to delete this class?"
- 12.Admin clicks "yes"
- 13.Admin is directed to new page "'class' is successfully deleted"
- 14.Course is removed from database
- 15.Admin receives confirmation email
- 16.Use case ends

Use Cases: Log In Teacher

LOG IN

This use case describes how a teacher would log into his or her account

USE CASE:LOG IN

ID: 4E

Risk Level: Low

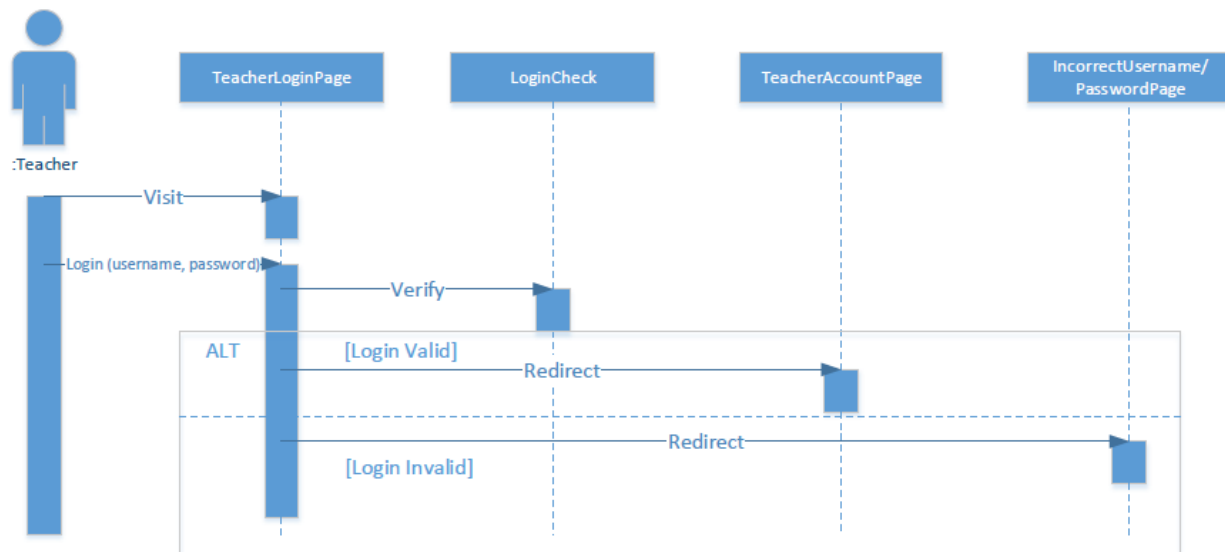

Primary Actor: Teacher

Preconditions: Teacher is not logged in

Postconditions: Teacher is logged in

Main Flow:

- 1.Instructor goes to www.lolaartswi.com
- 2.Instructor clicks "instructors" link at bottom of home page
- 3.Instructor is directed to instructor log in page
- 4.Instructor enters username in username text box
- 5.Instructor enters password in password textbox
- 6.Instructor clicks "log in"
- 7.Instructor is directed to account page
- 8.Use case ends

Use Cases: Add Photo

ADD PHOTO

This use case describes how an admin would upload photos

USE CASE:ADD PHOTO

ID: 5B

Risk Level: Low

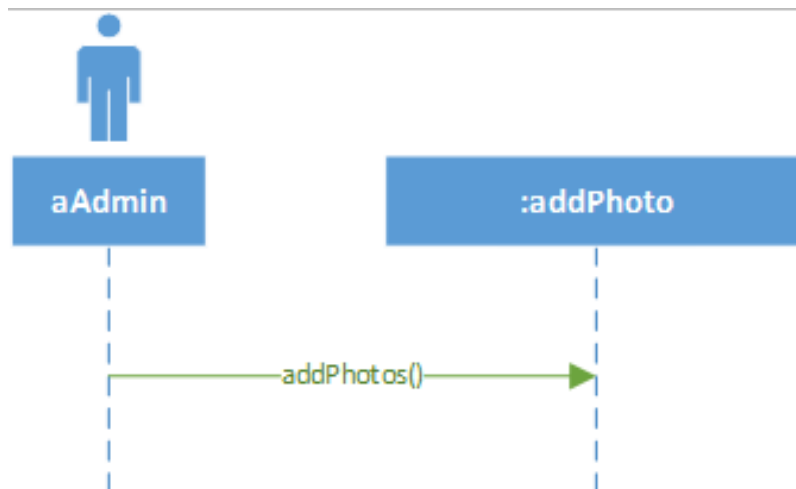

Primary Actor: Admin

Preconditions: None

Postconditions: Photo is uploaded

Main Flow:

- 1.Admin goes to www.lolaartswi.com
- 2.Admin clicks on "administration" link at bottom of home page
- 3.Admin is directed to admin log in page
- 4.Admin enters username in username text box
- 5.Admin enters password in password text box
- 6.Admin clicks "log in" link
- 7.Admin is directed to admin account page
- 8.Admin clicks "photo gallery" link
- 9.Admin is directed to photo gallery page
- 10.Admin clicks "upload photos"
- 11.File upload box appears
- 12.Admin selects desired photos
- 13.Admin clicks "upload" button
- 14.File upload box disappears
- 15.Uploaded photos appear in gallery
- 16.Use case ends

Use Cases: Modify Photo

MODIFY PHOTO

This use case describes how an admin would modify a photo

USE CASE: MODIFY PHOTO

ID: 5C

Risk Level: Low

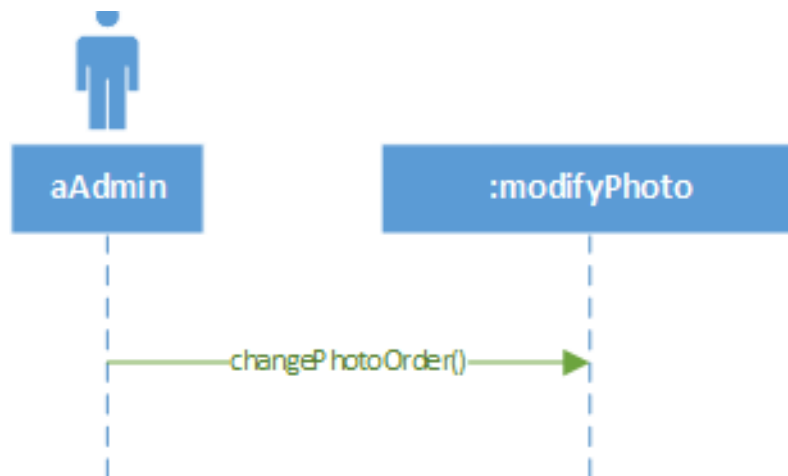

Primary Actor: Admin

Preconditions: None

Postconditions: Photo is modified

Main Flow:

- 1.Admin goes to www.lolaartswi.com
- 2.Admin clicks on "administration" link at bottom of home page
- 3.Admin is directed to admin log in page
- 4.Admin enters username in username text box
- 5.Admin enters password in password text box
- 6.Admin clicks "log in" link
- 7.Admin is directed to admin account page

Wendy: I am signed up to register this event. You guys want me to bring anything special?
Me: No, I think we have it handled. You could always bring those famous chocolate chip cookies though!
Wendy: Okay! I can do that.

Since to get to the LOLA Lovers part of the site a LOLA Lover will need to be logged in. Since they are logged in they do not have to submit any more information to be able to sign up to volunteer for a class or event.

Messaging Widget for this class/event. So volunteers can communicate with each other about events/classes.

Sounds good! See you then!

Admin Login Page

The image is a wireframe of an admin login page for a website titled "Admin Login - Land O' Lakes Artisans". The browser's address bar shows the URL "http://www.lolaartswi.com/admin/login". On the left, a vertical navigation menu contains links for "Home", "Classes/Events", "Donations", and "LOLA Lovers". The main content area features a large placeholder for the "LOLA Logo" at the top center. To the right of the logo area are a search bar labeled "Search" and a button labeled "Become a Member Today!". Below these are three social media buttons for "Facebook", "Twitter", and "Instagram". The central text of the page reads: "You must have admin access to reach this part of the site. Please contact the owner to get this access". Below this message are two input fields, one for "Email" and one for "Password", followed by a "Login" button. At the bottom, there is a link "Forgot Password? Click The Button Below" and a corresponding "Forgot Password" button. The entire page is enclosed in a simple rectangular border.
